Projects

Chill Find (Ice Cream Locator Website)

A web application that helps users find nearby ice cream shops, trucks, and vans.

- Detects user locations for precise results, while offering filtering based on distance and ratings.
- Displays custom map markers with detailed vendor information and direct navigation links for easy access.
- Technologies: **Google Maps API, Places API, JavaScript, HTML, CSS.**

Student Loan Calculator

A Java Swing application to help users calculate their student loan repayments based on salary, loan plan, course length, and fees.

- Features include tooltips for detailed information, a reset button to clear fields, and easy navigation between a main calculator and an "About" page.
- Technologies: **Java, Swing, IntelliJ IDEA, Java Development Kit (JDK) 8+.**

Experience

Student Lab Demonstrator | Department of Computing & Mathematics,

Sep 2024 -Present

Manchester Metropolitan University

- Assisted over 100 students in enhancing technical skills and problem-solving abilities across multiple modules.
- Collaborated with academic staff to conduct practical lab sessions, fostering effective communication and teamwork in a technical setting.

Teaching Internship | Chorlton High School

July 2024

- Mentored 30+ students during a 3-week internship.
- Worked with 3 mentors to design tech-enhanced lesson plans, incorporating programming and digital resources to support student learning.

Trading Assistant | Sainsbury's Local

April 2024 - Current

- Delivered exceptional service to over 200 customers daily by enhancing the shopping experience with product knowledge and personalized assistance.
- Improved inventory management processes, reducing discrepancies by 20%.
